

## SKIOLD CONE MIXER

SKIOLD MAKES THE DIFFERENCE!

### **SKIOLD CONE MIXER**

For mixing of compound feed and feed ingredients

Self cleaning and hygienic

Stainless steel

Space saving and compact

High precision 1:100.000

Accuracy verified by MTSE, Germany

# SKIOLD CONE MIXER

The cone mixer from SKIOLD is an accurate weighing bin and efficient mixer in one. The scale is constructed in heavy-duty stainless steel, and is very reliable. The function of the cone mixer is to weigh out batches of 30 to 50 kg. The throttle on the mixer opens automatically by means of an air cylinder.

A 300 x 300 mm discharge bin made in galvanized plate facilitates even and continuous feeding of material to the mill. A full level sensor ensures that the discharge bin always contains a sufficient quantity of weighed out raw materials to keep the mill fully loaded at all times.

## TECHNICAL SPECIFICATIONS

	Cone mixer
Mixing capacity (kg/hour)	1000
Batch size (litre)	80
Batch size (kg)	50
Batch time (minutes)	3
Mixing time (dry ingredients) (minutes)	<1
Mixing time (liquid ingredients < 6%) (minutes)	<2
Motor size (kW)	0.75
Outlet actuator	Pneumatic / Electrical
Mounting	On wall / On a stand
